DCR: two linear fits in $c_{\rm rel}\tan z$ (fit on half the bricks, residuals on the other half)
g band (break at x = -0.05)
r band (break at x = 0.15)
i band (break at x = 0.15)
z band (break at x = -0.40)
linear (current)
two lines
broken line
order 5 (ref.)
binned median
offset along parallactic dir. (mas)
held-out data − fit (mas)
$x = c_{\rm rel}\tan z$ (mag)
